

LETTER OF INVITATION

National Yang Ming University (hereinafter referred to as Yang Ming) and National Chiao Tung University (hereinafter referred to as Chiao Tung) just formally merged into the “National Yang Ming Chiao Tung University” (NYCU) on February 1, 2021.

It is my great pleasure to invite the outstanding students from your University to join the 「Microbial Biotechnology and Drug Discovery Pre-internship course (online)」 during 27rd December 2021- 15rd January 2022 in National Yang Ming Chiao Tung University, Taipei, Taiwan.

In this course, we aim to highlight areas of microbial biotechnology and medical microbiology research currently capturing the interest of pharmaceutical and biotech industries, and poised to grow in importance over the next few years. Students will have basic knowledge in bacteria, virus and fungi. The concepts on microbial drug discovery for probiotics and therapeutic biological drugs will also be covered.

Attached please find the syllabus of this 50-hour credit course. The student oral presentation is a crucial design which will be arranged by mixing students from different universities and countries. So they can work as a team to brain storm interesting research and industrial topics. It is a great opportunity for the students to learn not just from teachers and students in NYCU, but also students from other countries. Certainly, we also welcome the young lecturers to participate the course.

The original 2021 NYCU summer internship program can not be held due to the pandemic. At this critical time, on-line pre-internship course is the most efficient way for cross-country education. After the pandemic, we sincerely invite all the participated students to visit Taiwan and conduct lab internship. In this regard, we are very pleased to welcome you to have a fruitfully international interaction via this course.
